How create an instagram app and get the access token

1) Access: https://www.instagram.com/developer/clients/manage/

2) Click "Register a New Cliente"

3) Fill the information below. <u>Before you click the register button, go to the Security tab and uncheck the option "Disable implicit OAuth".</u>

Register new Client ID

Details   Security

Application Name: [   ]

Do not use Instagram, IG, insta or gram in your app name. Make sure to adhere to the API Terms of Use and Brand Guidelines .

Description:
[   ]

Company Name: [   ]

Website URL: [   ]

Valid redirect URIs: [Press Enter to confirm.]

The redirect_uri specifies where we redirect users after they have chosen whether or not to authenticate your application.

Privacy Policy URL: [   ]

Contact email: [   ]

An email that Instagram can use to get in touch with you. Please specify a valid email address to be notified of important information about your app.

Type the words above: [   ]

Register   Cancel

Application Name: just a name for the application to access later.

Website URL: your website url who will use this application.

Valid redirect URIs: the URL to redirect after register the application. Ps: could be the same as website URL.

4) After registering, you'll get your cliente id which we'll use later to get the access token. If this page doesn't show, just click on the "Manage Clients" menu.

get last photo

5) To generate the access token, use the URL below changing the information in bold:

https://instagram.com/oauth/authorize/?client_id=**YOUR_CLIENT_ID**&redirect_uri=**YOUR_REDIRECT_URL**&response_type=token

6) Sometimes this message will show up. Just click on the "Authorize" button.

Instagram

This app is in sandbox mode and can only be authorized by sandbox users.

Hi _____ , **Nome da sua app** is requesting to do the following:

Access your basic information   Your media & profile info

Not _____ ?   Cancel   Authorize

You should only authorize third-party applications that you trust, and you should understand how and when they will use your data. You may revoke this app's access at any time by visiting your profile page and clicking "revoke" in the access section.

7) If all Works, you'll be redirect to your redirect url. Just look at the url bar and copy the access token from there:

8) That's all!!!!!!
